

Packing “Tips and Tricks” for Troop 74 Backpacking Outings

Key points to keep in mind...

1. “Be Prepared”
 - Start packing 3 days before outing and plan ahead
(Allows enough time to wash a dry any necessary clothing items, etc.)
2. Use a checklist (See 50 Miler Gear List)
 - First check when sorted into piles, second when put into framepack
3. Be sure to use a framepack that is properly sized for your torso length
 - Shoulder Syncher straps should be between 25 and 45 degrees
4. A properly packed framepack will balance upright on its own
5. Place heaviest items against back and at shoulder blade height.
(This allows weight to center over hips, not behind them)
6. Arrange items across width of pack to minimize thickness away from spine
7. When possible, avoid attaching/hanging items external to pack
(Could cause balance issue)
8. Pack sleeping bag & spare clothing items in a waterproof stuff sack

Packing Order (from bottom to top of Framepack):

1. Sleeping Bag (in waterproof stuff sack)
2. Pillow Options:
 - a. Clothes sack (wrapped in sweater for padding)
